

# Size and Measurement

## Cookie Cutter Sizes

Directly compare and organize by size.

Group by shape.

Many cookie cutters come nested in a variety of sizes. The bear set can be used anytime, or with the Goldilocks story. Children simply put them in order from smallest to largest. To clean up, they have to “nest” them in correct size order.

## Size Hunt: Outdoor Learning

Directly compare amounts using words like bigger and longer.

This class went on a nature walk “size hunt” to find things in the outdoor environment of different sizes: something smaller than our fingernail, bigger than our hand, longer than our arm, smaller than our foot, bigger than our whole body, larger than a leaf, smaller than a house, etc.
